## ELEMENTAL SUPERHEROES!!!

**Introduction:** Congratulations! Marvel Movie Studios has just hired you to create and direct its brand-new superhero summer blockbuster movie. Only one problem...they don't have the new superhero yet. So, it falls on your shoulders to create the superhero.

**Mission:** Your job will be to use the Periodic Table of Elements to research an element, and then use the properties of the element to create a superhero.

### Process:

1. Select an element from the Periodic Table of Elements for your character.
2. Decide whether your character will be a superhero or a villain.
3. Research the physical and chemical properties and other information for your element.
4. Decide on the product you will present to the movie producer (Superhero Creator, Drawing, 3D Model, etc.)
5. Written Summary of your superhero's powers, and the powers correspond to the properties of the chosen element.

### My Chosen Element:
